Martin Petrov

PetroffSoft EOOD

Bilateral Meetings

- Thursday 15:30 - 17:00

Description

PetroffSoft has launched SMS notification software for expiring annual technical inspections and insurances.

Over the years, this project has evolved and expanded steadily, and is currently integrated into technical inspection checkpoints and offices of insurance brokers in cities in the whole country.

Due to the excellent success of the project and the enormous customer interest, the project is undergoing a new transformation and the desktop application is developing into a completely new WEB platform with multiple capabilities and various notification options.

The staff working at PetroffSoft have the opportunity to work on different projects built by different technologies.

We are capable of:

Ø designing and building mobile apps for Android and iOS

Ø building business-oriented WEB and RIA applications

Ø designing databases

Ø working with .NET, ASP.NET, Java, Android

PetroffSoft offers design, construction and maintenance of budget automated watering and irrigation systems for the home, villa, or farm.

We offer construction of individual irrigation systems tailored to the specifics of the site with the possibility of different starting modes:

Ø remotely from your smartphone

Ø automated - according to soil humidity or as per schedule

Ø manually
