Bilateral Meetings

- Thursday 15:30 - 17:00

Description

Our company was established with the plan to implement short, medium and long-range wireless TCP/IP communication solutions for commercial UAV platforms, in order to facilitate new services on the market and for the community. Our targets are private companies and public sector ranging from SMEs to bigger enterprises and institutions, while offering acceptable costs of products and services. Based on the existing communication technologies we intend to provide various types of solutions for different types of unmanned aerial vehicles ranging from light to heavyweight, and from short to long communication range, which shall be able to provide sufficient and reliable data transfer for various use cases.
